Shoutout to Abutters of Right-of-ways (ROW) power lines

You could be helpful in stopping more herbicide use along the power lines

- 1. Do you own land abutting the power lines?
- 2. Do you have an easement with Eversource/NSTAR on the deed to your land?
- 3. What does the easement read regarding vegetation management overgrowth? (mechanical methods, hand pruning, or chemical)

POCCA seeks easements of ROW abutters in April

Please scan your easement and send to poccacapecod@gmail.com

poccacapecod.org

As an Abutter you have the strength to help stop more herbicide use along ROW by:

1. Call Eversource at (800)-592-2000, ask to be exempt from herbicidal application 2. If your easement with Eversource states "to maintain vegetation growth with the use of mechanical methods" (NOT CHEMICAL) then the POCCA team will guide you through

the simple process of joining this case in Superior Court.

We did this two years ago and won.

POCCA has a lawyer willing to represent you, the abutter, for FREE, your only cost would be:
a). \$250 to file in court. This paperwork we will do for you, the cost is that per abutter.
b). \$150 to cover mailing fees. The requirement of the court is for the abutter to mail all paperwork by certified mail to Eversource plus their four (4) companies they hire to do maintenance work. Again, this is something the POCCA team would help do for you.

If a few abutters from each cape town that are listed on the YOP 2017: Barnstable, Bourne, Brewster, Chatham, Dennis, Edgartown, Falmouth, Harwich, Oak Bluffs, Orleans, Sandwich, Tisbury, or Yarmouth. Join the mission, we will have a better chance of a *no spray* policy in 2017.

Please scan your easement and send to poccacapecod@gmail.com

Please visit poccacapecod.org

Thank you for caring to join the mission and sharing this information with anyone you feel would like to help.

It is up to us to protect the land we all love, Cape Cod, and the precious resources upon it. They are our livelihoods, our drinking water, and our enjoyment.
