

Helping to Protect Our Quality of Life on Cape Cod

How can you lessen your impact above our aquifer?

Below is a list of ways you can shift to better affect the drinking water on Cape Cod.

Will YOU Join the Mission?

Simple acts of making wise choices every day for the betterment of Cape Cod:

1 - Vote with your dollar ~ Where you spend money matters! Will you purchase as much as you possibly can from Cape Cod businesses, farmers, crafters and artists? You would help build up our economy here. Supporting local businesses means you aren't building up big corporations and you are giving local families a better chance.

2 - Become truly non-toxic ~ What you buy affects nature! Will you purchase non-toxic products for inside and outside your home and body? You would help protect your loved ones, pets and natural resources for generations to come.

3 - Recycle 100% ~ How you treat your waste counts! Will you be responsible for the waste you collect? Transfer it properly so it doesn't end up in a land fill somewhere to rot over time.
